Garrison’s NCLEX Review

MISSION STATEMENT

Mission Statement: By the time people find my Review for the NCLEX, they are broken souls spiritually, financially and physically. Caring 4 You Nursing Services understands how you feel. I can help you 100% with the NCLEX as I keep everything current and up to date. Although I have been helping with the NCLEX since 1997, I have only started tutoring since 2014. I take a spiritual, self - responsible approach mentoring you to pass the NCLEX through your actions, through your thoughts and through your feelings. For no one can pass the NCLEX but you. Passing is your responsibility as no one can do it for you. I will help you to keep up with the changes on the NCLEX. All you need is self - accountability and self - responsibility I will provide the tools. Help me to help you by the effort you put forth.

People struggle for several reasons:

1). They do not know the content.
2) They do not do the preparation for the session.
3). They do not do questions specifically for the areas they are weak in. Do 75 - 150 questions EACH DAY
4). They let their own personal emotional triggers guide their thought process as they do the NCLEX.
5). They do not read the question correctly.
6). When two people are mentioned the question (spouse, mother etc) keep in mind the needs of both the care giver and the client
7). They do not have my concepts printed out and have them where they can refer to them.

At the end of each NCLEX training Session the following questions will be asked:

QUESTION: What did you learn about yourself with this session?
REASON: The purpose is to help you identify your own personal weakness on answering the NCLEX questions in an expert capacity. To pass the NCLEX one must get 50% of the expert questions correct.
2.

QUESTION: What can you do to listen to your inner senses to get the NCLEX question correct?
REASON: All of us have 5 “inner senses”. Taste, touch, feel, smell and vision. Due to the world around us being so noisy, we do not pay attention to these senses. This is that “gut” feeling that one has and ignores. This is why you change your answer. One ignores their “gut” feeling. One does not listen to their inner sense which is usually a involuntary response to correctness.

QUESTION: How can you self – correct so you can pass the NCLEX?
REASON: people try to take short cuts and not follow directions. Follow directions and you will pass.

Directions:
Listen to my mp3’s that come with the package at least twice. They are called THE 9 SYSTEM REVIEW. This task does not have to be finished at all before tutoring begins but it must be finished before you take your NCLEX.

Memorize all of my concepts

Do 75 to 150 questions a day from the books I recommend. Supplement with anything you want but practice 75 – 150 questions a day so that you can get familiar with using my concepts.

Do the AFTERCARE session if you are not taking the NCLEX 3 days after tutoring sessions end. This session is a separate charge. This is to “polish” you before you go to take the NCLEX. This 1 – 2 hour session will address any last minute questions you may have. Address any anxiety issues you may have and pray with you if needed. This session addresses the spiritual and emotional and last minute preparation you may need to help you be successful with the NCLEX.

May God bless you richly as you embark on your new journey in life as you are “born” into a career in Nursing. Having said this, we are all family here and we are here to help each other.

Sincerely,

Anneliese Garrison,
Helping students pass the NCLEX since 1997
